About this course

Master the basics of web development. Learn HTML5, CSS3, and core JavaScript concepts to build your very first responsive website from scratch.

This beginner-friendly course walks you through the building blocks of the modern web — from structuring pages with semantic HTML to styling layouts with CSS and adding interactivity with JavaScript. By the end, you'll have built and published a responsive site you can show employers.

What you'll gain

- ✓ Write clean, semantic HTML5 to structure real web pages
- ✓ Style responsive layouts with CSS3 that work on any screen
- ✓ Add interactivity with core JavaScript fundamentals
- ✓ Build and publish your first portfolio-ready website
